AUSTERAS HISTORY

- *AUSTERAS was born in Verona in 1970, and the main activities carried out are the construction of self-steering axles for industrial vehicles.
Over the years, specialized in the conversion of industrial vehicles, with the application of axle added.
To give better service to its customers, AUSTERAS starts the production of trailers and special vehicles with the installation of fixed body, curtainsider, tipper and crane applications.
Austeras today is a company with a complete range of products, which is being updated the process of ISO certification process, in fact Austeras in 1997 was the first Italian company in the industry to be certified ISO 9001.
AUSTERAS is now one of Europe's largest companies for the conversion and preparation of commercial vehicles*
